Portfolio | Darbhanga, India | **Open to relocation to Germany / EU** | Available immediately

PROFESSIONAL SUMMARY

Backend-focused Software Developer with 1.5+ years of production experience building Node.js, TypeScript and PostgreSQL platforms. Core experience on an EU-regulated (ECSP) real estate crowdfunding platform: 8-step KYC/AML onboarding with Sumsub, financial-crime compliance modules and state-machine-driven workflows. Also shipped workforce, hiring and social commerce products for clients in Europe and Australia, and built RAG/agent features with LangGraph and FastAPI.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Python
- **Backend:** Node.js, Express.js, FastAPI, REST API design, Authentication & RBAC, State machines, Cron jobs, Swagger/OpenAPI
- **Databases:** PostgreSQL, MongoDB, Prisma ORM, Schema design, Query optimization, Aggregation pipelines
- **Frontend:** React.js, Next.js, Redux, Tailwind CSS, HTML5, CSS3
- **AI/LLM:** LangChain, LangGraph, RAG, Chroma vector DB, Ollama (local LLMs & embeddings)
- **Domain & Tools:** KYC/AML compliance, Sumsub WebSDK, Git, GitHub, Postman, pgAdmin, MongoDB Compass

WORK EXPERIENCE

Software Developer — Brain Technosys Pvt. Ltd., India *Feb 2025 – Aug 2026*

Delivered backend and full-stack work for 4 client products; built 50+ production REST APIs with Express.js, MongoDB, PostgreSQL and Prisma.

Opalus — EU-regulated (ECSP) real estate crowdfunding platform, Lithuania | *Node.js, Express, MongoDB, PostgreSQL, React, Sumsub*

- Built an 8-step KYC/AML onboarding flow with Sumsub WebSDK covering residency verification, tax profiling, investor categorisation and knowledge assessments required under ECSP regulation.
- Designed a money-operations and financial-crime compliance module using a provider-agnostic adapter pattern, so payment and AML providers can be swapped through environment toggles without code changes.
- Built a project-publication state machine with role-based transitions, conditional field locking and automated admin review.
- Fixed investor-list pagination drift across 100+ active projects by running count and data aggregation pipelines in parallel (Promise.all).

Shift Work — workforce & shift management platform, Australia (shiftwork.au) | *Node.js, TypeScript, Prisma, PostgreSQL, MongoDB*

- Built backend services for a platform with 1000+ users; implemented 30+ REST APIs for scheduling, timers, payments and reporting.
- Built cron-based invoice generation with PDF rendering and Australian tax-compliant (GST) formatting, producing 500+ invoices per month.
- Implemented soft-delete data handling and OTP-verified account deletion.

Hirra (hiring platform) & HomiiConnect (social commerce) | *Node.js, Express, Next.js, Prisma, PostgreSQL, MongoDB*

- Hirra: built hiring workflows and APIs for subcontractor management, applicant tracking and job matching.
- HomiiConnect: designed backend APIs for posts, videos, stories, communities, polls and a marketplace on Next.js + Prisma/PostgreSQL.

PROJECTS

Levender — AI Assistant for an Investment Platform *Details in portfolio*

Python, FastAPI, LangChain, LangGraph, Chroma, Ollama, Node.js/MongoDB

- Built a LangGraph agent (custom StateGraph) that decides per query whether to look up live platform data or search the knowledge base.
- Built a RAG pipeline over eligibility rules and regulatory documents, using self-hosted Ollama embeddings (nomic-embed-text) and Chroma.
- Integrated with the existing Node.js platform so verified eligibility data is passed to the model as facts, keeping answers grounded.

EDUCATION

B.Tech, Computer Science and Engineering — Centurion University of Technology and Management *2021 – 2025 · CGPA 8.48/10*

CERTIFICATIONS & ACTIVITIES

- MERN Stack Web Development — CodeHelp | Problem Solving & Algorithms — TCAC | Organised hackathons and tech workshops with 250+ participants
- **Languages:** English (professional), Hindi (native)
